

# Ajax

Wednesday, 8 February 2023 4:13 pm

Jquery is lib of js

Write jquery code in site.js

JQUERY has many functions.  
Ajax is also func of jquery

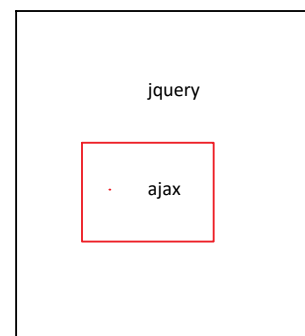

When we get response , complete page is reloaded

If we want when button is clicked, not whole page is refreshed, only that response is embedded on section of that page using ajax function of jquery.

## AJAX

- Get
- Post
- .ajax (generic function of ajax)
- load

Jquery is a whole library

Ajax is part of jquery.

We will call api using jquery.

We will use partial views withjquery.

We can also do animations using jquery.

We can also upload file using jquery.

## WORK

- AJAX
- MODEL VALIDATION
- 100% SITE.
